

UNITED STATES COAST PILOT CORRECTIONS

COAST PILOT 8 35 Ed 2013 24 NOV 2013
LAST NM 47/13

Chapter 4—Paragraphs 294 to 295; read:

⁽²⁹⁴⁾ **Ward Cove**, entered about 0.7 mile N of Peninsula Point, is on the N side of Tongass Narrows about 5 miles NW of Ketchikan. The cove is about 0.3 mile wide at the entrance, wider inside, and has steep shores. A long log boom extends from the NE end of an inoperative pulp-mill to the ledge. **East Island** is a wooded islet off the NW side of the entrance. A midchannel course leads safely into the cove, and there are no known dangers other than those mentioned.

⁽²⁹⁵⁾ Anchorage may be had 0.1 mile E of East Island in 20 to 30 fathoms. The bottom of Ward Cove is strewn with logs throughout, with the highest concentration near the head. Within these areas of dense log concentration, there are numerous, potentially dangerous snags. Mariners are advised against anchoring in these areas and to use caution anchoring in all other areas of the cove. Small craft often tie up to the anchored log booms in the cove.
