COAST PILOT 6	45 Ed 2015	04 OCT 2015
		LAST NM 40/15

		43/15
Chapter 6—Paragraphs 523 to 525; read: ⁽⁵²³⁾ Small-craft facilities ⁽⁵²⁴⁾ The City of Vermilion Port Authority operates the Water Works Public Guest Docks at the Water Treatment Plant on the west side of the river, opposite the entrance to Superior Lagoon. The Port Authority also maintains a public launching ramp just above the Norfolk Southern Railroad bridge. Several private marinas are on either side of the Liberty Avenue bridge and can provide transient berths, gasoline, diesel fuel, water, ice, pump-out, electricity, launch ramps and marine supplies. Several of these marinas also have lifts/hoists and mechanics available. ⁽⁵²⁵⁾ All of Vermilion's large marinas, numbering well over 1,000 berths, are above the Liberty Avenue bridge. The vertical clearance of the Liberty Avenue bridge prevents sailboats and larger powerboats from navigating above it. Mariners requiring a variety of services should not rule out using the services of these marinas despite the bridge height restriction. (IDMS 26481)
